ACKNOWLEDGMENTS

The present volume is the outcome of two symposia, which were organized as the Second and Third Annual Meeting of IOTa (Interfacultaire Onderzoeksgroep Taalkunde), respectively. The first, held on 17 April 2002, addressed the relationship between language and various conceptions of the term ‘revolution’. The second took place on 4 April 2003 and tackled issues of language and time. With these meetings, we bring together linguists and other researchers working on the three campuses of the University of Antwerp, and beyond. The meetings deal primarily with topics of an explicitly interdisciplinary nature, as we would like to reach as many scholars as possible, both within the various domains of linguistics and in neighboring disciplines of the humanities and the social sciences.

The contributions contained in this volume constitute the totality of the talks that were given at both symposia. We wish to thank all of the presenters included.

The two symposia were financially backed by kind support from the Faculty of Arts (University of Antwerp, city campus), as well as from the Antwerp graduate program in linguistics.

TABLE OF CONTENTS

Frank Brisard, Sigurd D’hondt & Tanja Mortelmans vii
Introduction: Signs of the times

PART 1: LANGUAGE & REVOLUTION
E.F.K Koerner 3
Linguistics and revolution with particular reference to the ‘Chomskyan revolution’

Pieter A.M. Seuren 63
How the cognitive revolution passed linguistics by

Helge Daniëls 79
Linguistic conservatism as the basis for political revolution?
The fushā-‘āmmīyah debate in nineteenth-century ottoman-arab middle eastern society

Jean Paul Van Bendegem 93
Why do so many people search so desperately for a universal language (and fortunately fail to find it)?

PART 2: LANGUAGE & TIME
Johannes Fabian 117
Language and time

Koen Bostoen 131
Linguistics for the use of African history and the comparative study of Bantu pottery vocabulary

April McMahon 155
Language, time and human histories

Frank Brisard 171
Time in grammar

Walter De Mulder 195
Can there be a nontemporal definition of the French imparfait? A “network” approach

Wolfgang Wildgen 223
Time, motion, force, and the semantics of natural languages
