The 15th EU/MEeting in Istanbul was a success. Bilecik Şeyh Edebali University (BŞEU), its main organizer Y. Cengiz Toklu and all his team were able to successfully conduct the organization of this event. The scientific program was made of several keynote speakers who were able to bring their experience and expertise in metaheuristics. Also, some long term experienced researchers in metaheuristics present their new research topics and newcomers in the field presented their first steps in using metaheuristics, receiving advices and comment for future research directions.

The proceedings of the event [can be downloaded here](#) .

Once again, the EU/ME board would like to thank the local organizers for the excellent work on the scientific program as well as on the social program.
